

Exploring the future use of the 1880 –1920 MHz band

Submission by Clear-Com LLC

February 4, 2022

To whom it concerns within the Australian Communications and Media Authority

We are manufacturers and suppliers of DECT based FreeSpeak II Digital Radio systems that we sell through in-country partners into Australia. It is an established and leading product within media and entertainment markets in Australia.

The DECT FreeSpeak II system uses approved radio bands within Australia allocated for DECT use. It carries registered approvals. FreeSpeak II operates within the 1880 -1900 MHz band and complies with DECT operation.

The use of this DECT duplex real-time multichannel radio system allows media productions within Australia to be coordinated so that stage performances, touring performers, TV broadcast and remote broadcasts can be effectively and safely directed. The FreeSpeak II system is held by many venues, broadcasters, touring groups, industrial sites, casinos, and rental companies in Australia with some also submitting in responses to this discussion paper.

Here is a link to the DECT FreeSpeak II system information:

DECT Radio Portable part: <https://www.clearcom.com/product/1-9ghz-digital-beltpack/>

DECT Radio Fixed part: <https://www.clearcom.com/product/fsii-tcwr-19/>

Please take notice of this existing use of the radio space supporting a multi-billion-dollar entertainment industry in Australia.
